**Apple Valley Airport (APV)  
Aviation Activity Forecast Approval**

Dear Mr. Godown,

The Federal Aviation Administration (FAA) has reviewed the aviation forecast for the Apple Valley Airport (APV) dated July 21, 2025. FAA Order 5050.4B, National Environmental Policy Act (NEPA) Implementing Instructions for Airport Actions requires Aviation Forecasts to aid in efficient environmental analyses. The forecast is supported by reasonable planning assumptions, current data, and appears to be developed using acceptable forecasting methodologies. The FAA approves this forecast for use in the analysis for the Master Plan Update.

It is important to note that the approval of this forecast does not guarantee future funding for capital improvements as future projects will need to be justified by current activity levels reached at the time the projects are proposed for implementation and will need to be further analyzed for Airport Improvement Program eligibility purposes.

If you have any questions about this forecast approval, please call me at 424-405-7276.

Sincerely,

Justin Guan
